EDUCATION

Bachelor of Technology (B.Tech) in Computer Science

College of Engineering Chengannur (2024 – 2028)

Higher Secondary Education

Girideepam Bethany Central School, Kottayam (2022 – 2024)

SKILLS

- Linux Administration
- Network Engineering
- Event Coordination
- Python Development
- Computer Vision (OpenCV)
- Cybersecurity | OWASP | Nmap
- React | Node.js | Fast Api
- Tailwind
- MongoDB | Git & GitHub | REST AP
- Event Planning
- Full-Stack Development
- Leadership

TECH STACK

- Python | JavaScript TypeScript | SQL HTML5 | CSS3 | Bash Scripting

PROFILE

I am an enthusiastic B.Tech Computer Science student at the College of Engineering, Chengannur, with a solid technical foundation and a deep passion for cybersecurity and digital safety. Driven by a commitment to excellence and continuous learning, I thrive in environments that challenge me to think critically and innovate. I am eager to connect with industry professionals and peers to exchange ideas and collaborate on impactful projects that push the boundaries of the cybersecurity space.

Projects

F OCES Event Tracker 2025

Full-Stack Developer

Engineered a full-stack event management web application tailored specifically for the FOCES Volunteer Project 2025-26. Developed a robust backend API using Python and FastAPI, integrated with a responsive, modern frontend built on React and Tailwind CSS. Implemented dynamic search filters, detailed event modals, and UI state management to streamline campus event tracking and organization.

TinkerHub Hackathon (slowLang)

Won the TinkerHub Useless Projects competition by developing a custom, interactive IDE using Python and Tkinter.

Engineered a real-time typing-speed enforcement system with dynamic ASCII feedback.

OWASP Kerala Bootcamp 2025 participant

Completed advanced cybersecurity tasks including vulnerability assessments, OSINT (Google Dorking), and TryHackMe challenges. Executed practical security exercises, including a Gophish simulated phishing campaign and comprehensive Nmap scanning.

Project Aegis | Backend & AI Engineer

Engineered a Hybrid-Edge AI Cyber Incident Responder alongside a specialized team during a rigorous 10-hour hackathon sprint.
Integrated local AI models to dynamically analyze and respond to simulated security threats.

Experience

FOCES CEC
Project Coordinator
April 2026 - Present
Chengannur
Coordinate and manage technical projects and community initiatives for the FOCES 2026-27 Executive Committee.
Collaborate with fellow committee members to plan, execute, and oversee the club activities, ensuring smooth operations and high student engagement.

CampusCrew
Student Ambassador
December 2025 - present
